

As geographers we will find out about London. We will learn about some of the key landmarks and the river Thames.

As scientists we will learn about different animals that live in Peru and their habitats. We will also look at everyday materials and their uses.

# Paddington

## Infant Class

As musicians, we will prepare for Mothering Sunday and Easter. We will learn hymns to perform during both services. We will also add actions to some of our singing to help relay its message.

As mathematicians, our focus will be developing and applying our number knowledge to solve addition, subtraction, multiplication and division. We will also learn to tell the time, on analogue and digital clocks. Some of us will be learning the five minute intervals on an analogue clock. We will also understand and order fractions.

Computing  
We will use stop frame animation to create our own Paddington story.

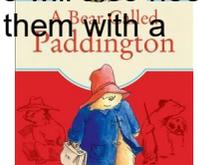

RE  
We will find out about places of worship from different religions. We will find out the main features of each place of worship and then construct our own using small and large construction materials.

In PE, we will develop our tag rugby skills with Mr Bagnall. We will also create our own dance based on London landmarks. We will work in pairs and small groups, using our bodies to take you on a tour of London.

As designers we will look at London landmarks, including bridges and buildings. We will create a group construction of a chosen landmark. We will plan what we need before we create and review our work when we have finished. We will also create moving posters,

As writers, we will read Paddington stories. We will also read a range of text in our guided reading groups and individually. As writers we will use the stories of Paddington to write our own Paddington adventure. Within our story we will think about London landmarks and what Paddington might get up to there. We will also develop our SPaG skills to create our stories, to do this we will also need to proof read our stories and share them with a friend.

As artists we will look at a range of works in London art galleries and use them as inspiration for our own work. We will look at the technique of pointillism and use this skill to create our own painting of a London landmark.
