

'Caring, sharing, and always learning.'

Through science we will care for our planet and animals.

We will share our learning by working collaboratively

We will learn new knowledge and skills about science and scientists

Our vision for Science

Make links
with other
ideas and
subjects

Topics, knowledge
and skills mapped
out with clear
progression and
balance between
the science
disciplines

It's real, fun
and the
children enjoy
collaboratively

Effective use of
resources
including our
outdoor space and
planned visits and
visitors

Develops a
range of skills
and
vocabulary

Link science to
where we live
and the things
we love
